## Biometrics Door Lock System

(Model : DG 6600-98)

- 3 different access methods - Fingerprint Access, Keypad Code Access or Traditional Mechanical Key Access.
- Durable design, Hard Glass with Nano-treated surface, extremely resistant to friction,
- 150 Fingerprints Capacity, 78 Password Capacity, FRR ≤ 1%, FAR ≤ 0.0001%, ±60° fingerprint-detect angle
- Fingerprint sensor extreme resistance to destruction, bright background light, 560 dpi resolution factor.

Compared with any traditional locks, the fingerprint lock has obvious application advantages. The individuality of the fingerprint enhances the users' performance requirement of security, and can avoid the hidden trouble of lost, stolen or copied mechanical keys or access cards. These advantages make the fingerprint lock more and more acceptable for users.

The following major features are characteristic of human's fingerprints:

- Human's fingerprints are of unique features. According to experts, the repetition probability of human's fingerprints is one every 5 billion, and the accuracy and complexity of features are sufficient to meet the demand of extremely difficult identification;
- With diversified selections, everyone can select more than 10 fingerprints;
- It features to be of steady and of reliable read access;
- Collection of fingerprints is of non-destructive and non-sensitive collection which can be easily accepted by people whose fingerprints are collected. With all these characteristics and features, it is safe to assume that security will be improved to some extent.

### Model No: DG 6600-98
